

Draw your own bear

Start with a circle, lightly drawn with a pencil.

Add two half circles for ears

The hard part: drawing in the long nose. Here's the shape:

Add the nose's tip. Here it is by itself. Under it is the mouth.

The eye begins as a dot. Add a black middle. A tiny line goes toward the nose.

I've added lots of detail. I've put in his neck. The shaggy fur lines are fun to draw.

I'm going to draw the same bear face, and try out different expressions. It's okay to copy, but you will find the artwork you're most proud of is your own.
